

Pharmacy Announcement: Diabetic Test Strips for Members with High-Risk Pregnancies

November 7, 2022

Dear Providers,

We are making it easier for our high-risk pregnancy members to obtain their diabetic test strips. Beginning 11/1/2022, there is a Smart Prior Authorization (PA) in place to allow members with gestational diabetes to receive up to 200 test strips per 30 days at a network pharmacy.

For these claims to successfully process using the Smart PA logic, the pharmacy will need to enter the ICD-10 code related to gestational diabetes when processing the prescription.

As a reminder, One Touch products are the preferred brand of diabetic testing supplies for SilverSummit Healthplan. Members can order a One Touch meter at no charge:

Visit www.OneTouch.orderpoints.com and input brochure code 789ENV001 or call 833-374-4417 and provide brochure code 789ENV001.

For meters picked up at the pharmacy, see billing information below:

BIN# 601341
PCN# OHS
ID# NOCHARGEMTR
Group# LVUM384

Thank you,
SilverSummit Healthplan
