**We look forward to meeting you.**

**We will go over submitting referrals using the provider portal.**

Ambetter Value features a primary care provider (PCP)-centric approach to care delivery. PCPs coordinate our members' medical care, as appropriate, either by providing treatment or by issuing referrals to other in-network providers.

For services to be covered, they must be provided by or referred by a PCP. The only exclusions from this requirement are emergency or urgent care services, as well as in-network mental or behavioral health services, obstetrical or gynecological services.

**Thank you for being an  
Ambetter Value provider!**

As we launch this new Ambetter product, we want this process to be very seamless for you. This product does **REQUIRE A REFERRAL** and we have made enhancements to the Provider Portal to make the referral process as easy as possible for you.

These referrals are also required for us to process your claims properly and in a timely manner. These sessions are great avenues to learn more about Ambetter Value as we will explain the unique features of the product. Our goal is for these learning sessions to help you with the process **so you can focus on what you do best -- taking care of our members.**

**Our network offers members enrolled in Ambetter Value cost-efficient coverage with benefits that include:**

**Comprehensive Medical Care** – for access to essential health benefits, such as preventive care,maternity care and emergency services;

**Easy Care Navigation** – a streamlined continuum of care built around a single health system that simplifies the member r health care journey;

**Prescription Coverage** – for access to a wide range of available and approved brand and generic medications; and

**Care and Disease Management** – for access to managers to ensure patients receive care and support services as part of their treatment plan.
