

Free Risk Adjustment Webinars

November 15, 2022

Dear Providers,

The Centene Clinical Documentation Improvement (CDI) is offering **free** Web-based trainings designed to enhance your documentation and coding with the upcoming 2023 ICD-10 coding guidelines. After you have completed the training session, you will have the ability to request a chart review in which the CDI Team will send a list of 20 random members, obtain the 2022 date of service charts and review for documentation/coding deficiencies. Once the review of charts is complete, education on opportunities will be discussed with an option to repeat the process in 6 months. If you do not request to have a sample chart review completed, there is no additional action required after the training has been completed. This initiative will also assist your group with documentation and coding accuracy for all Centene contracted lines of business - **Medicare, Marketplace and Medicaid.**

Who should attend: all Clinician levels, Coders, etc.

Please register for one of the following training options using the below links:
